

1 **Listing of Claims:**

2
3 This listing of claims will replace all prior versions, and listings, of claims in the application.

4
5 1. - 183. (Canceled).

6
7 184. (Previously presented) The method as recited in claim 258 wherein said step of sending
8 recipient data for confirming proper delivery of said e-mail includes the steps of:

9 a) generating a confirmation of receipt notice wherein the inputted recipient data is included with
10 said confirmation of receipt notice; and

11 b) sending said confirmation of receipt notice, wherein the inputted recipient data included with
12 said confirmation of receipt notice can be compared to information associated with said intended
13 recipient in order to verify whether the e-mail was accessed by the intended recipient.

14
15 185. (Previously presented) The method as in claim 236, wherein said access event comprises
16 access of said e-mail that was delivered to said recipient e-mail address.

17
18 186. (Previously presented) The method as in claim 236, wherein said access event comprises
19 access of an e-mail account associated with said recipient e-mail address.

20
21 187. (Previously presented) The method as in claim 236, wherein said access event comprises
22 activation of an e-mail processing software associated with said recipient e-mail address.

23
24 188. (Previously presented) The method as in claim 236, wherein the step of transmitting an e-
25 mail from a sender computer includes attaching an executable attachment file in conjunction with
26

1 the e-mail, the executable attachment file having a first module for prompting the party who
2 requested said access event to enter recipient data; and

3 and wherein the step of detecting an access event includes the step of executing the first
4 module of the executable attachment file.

5
6 189. (Previously presented) The method as in claim 188, wherein the executable attachment
7 file has a second module transmitted and delivered therewith, the second module for detecting the
8 access event, and further comprising the step of automatically executing the second module upon
9 delivery of the attachment file to the recipient e-mail address.

10
11 190. (Canceled).

12
13 191. (Previously presented) The method as in claim 236, wherein said recipient e-mail address
14 is associated with a recipient computer.

15
16 192. (Previously presented) The method as in claim 191, wherein said recipient computer is a
17 server of a service provider.

18
19 193. (Previously presented) The method as in claim 191, wherein said recipient computer is a
20 user system that is directly accessible by a recipient, said user system including electronic mail
21 processing software.

22
23 194. (Previously presented) The method as in claim 236, wherein said inputted recipient data
24 pertains to alphanumeric text identification, biometric identification, password identification, a
25 computer generated user code, or a combination thereof.

1 195. (Previously presented) The method as in claim 236, wherein said inputted recipient data
2 comprises identity information that identifies an individual.

3
4 196. (Previously presented) The method as in claim 195, wherein said identity information
5 pertains to biometric identification.

6
7 197. (Previously presented) The method as in claim 196 further comprising the step of
8 recognizing biometric attributes of an individual.

9
10 198. (Previously presented) The method as in claim 195, wherein said identity information
11 includes alphanumeric text identification information.

12
13 199. (Previously presented) The method as in claim 236 , wherein said inputted recipient data
14 comprises information that identifies a business.

15
16 200. (Previously presented) The method as in claim 236, wherein said inputted recipient data
17 comprises information that identifies an organization.

18
19 201. (Previously presented) The method as in claim 236 , wherein said inputted recipient data
20 comprises a computer generated user code.

21
22 202. (Previously presented) The method as in claim 236 further including the step of sending
23 access event data of attendant conditions of said access event.

24
25 203. (Previously presented) The method as in claim 236 , wherein said recipient is an
26 individual.

1 204. (Previously presented) The method as in claim 236, wherein said recipient is a business.

2
3 205. (Previously presented) The method as in claim 236, wherein said recipient is an
4 organization.

5
6 206. (Previously presented) The method as in claim 236, wherein said inputted recipient data
7 is used to verify proper delivery of legal documents.

8
9 207. (Previously presented) The method as in claim 236, wherein said inputted recipient data
10 is used to verify proper delivery of confidential documents.

11
12 208. (Previously presented) The method recited by claim 260 wherein said step of sending
13 recipient data for confirming proper delivery of said e-mail includes the steps of:

14 a) generating a confirmation of receipt notice wherein the acquired recipient data is
15 included with said confirmation of receipt notice; and

16 b) sending said confirmation of receipt notice, wherein the acquired recipient data
17 contained with said confirmation of receipt notice can be compared to information associated with
18 said intended recipient in order to verify whether the email was accessed by the intended recipient.

19
20 209. (Previously presented) The method as in claim 260, wherein said access event comprises
21 access of said e-mail that was delivered to said recipient e-mail address.

22
23 210. (Previously presented) The method as in claim 260, wherein said access event comprises
24 access of an e-mail account associated with said recipient e-mail address.

1 211. (Previously presented) The method as in claim 260, wherein said access event comprises
2 activation of e-mail processing software associated with said recipient e-mail address.

3
4 212. (Previously presented) The method as in claim 260, wherein the step of transmitting an e-
5 mail from a sender computer includes attaching an executable attachment file in conjunction with
6 the e-mail, the executable attachment file having a first module for acquiring recipient data that is
7 related to biometric identification of the recipient, and

8 wherein the step of detecting an access event includes the step of executing the first module
9 of the executable attachment file.

10
11
12 213. (Previously presented) The method as in claim 212, wherein the executable attachment
13 file has a second module transmitted and delivered therewith, the second module for detecting the
14 access event, and further comprising the step of:

15 automatically executing the second module upon delivery of the attachment file to the
16 recipient e-mail address.

17
18 214. Canceled.

19
20 215. (Previously presented) The method as in claim 260, wherein said recipient e-mail
21 address is associated with a recipient computer.

22
23 216. (Previously presented) The method as in claim 215, wherein said recipient computer
24 is a server of a service provider that is capable of receiving e-mail.

1 217. (Previously presented) The method as in claim 215, wherein said recipient computer
2 is a user system that is directly accessible by the recipient, said user system including electronic
3 mail processing software and being capable of receiving e-mail.

4
5 218. (Previously presented) The method as in claim 260, wherein said acquired recipient
6 data is related to a biometric imprint, alphanumeric text identification, password identification, a
7 computer generated user code, or a combination thereof.

8
9 219. (Previously presented) The method as in claim 260, wherein said acquired recipient
10 data comprises identity information that identifies an individual.

11
12 220. (Previously presented) The method as in claim 260 further comprising means for
13 recognizing biometric attributes of an individual.

14
15 221. (Previously presented) The method as in claim 260, wherein said acquired recipient
16 data comprises information that identifies a business.

17
18 222. (Previously presented) The method as in claim 260, wherein said acquired recipient
19 data comprises information that identifies an organization.

20
21 223. (Previously presented) The method as in claim 260, wherein said acquired recipient
22 data comprises a computer generated user code.

23
24 224. (Previously presented) The method as in claim 260 further including the step of
25 sending access event data of conditions attendant said access event.

1 225. (Previously presented) The method as in claim 260, wherein said recipient is an
2 individual.

3
4 226. (Previously presented) The method as in claim 260, wherein said recipient is a
5 business.

6
7 227. (Previously presented) The method as in claim 260, wherein said recipient is an
8 organization.

9
10 228. (Previously presented) The method as in claim 260, wherein said sent recipient data
11 is used to verify proper delivery of legal documents.

12
13 229. (Previously presented) The method as in claim 260, wherein said sent recipient data is used
14 to verify proper delivery of confidential documents.

15
16 230. (Canceled).

17
18 231. (Previously presented) The method as in claim 260, wherein said recipient data is
19 acquired as a requisite condition for permitting access to said delivered e-mail.

20
21 232. (Previously presented) The method as in claim 260, wherein said recipient data is
22 acquired as a requisite condition for permitting access to said recipient e-mail address.

23
24 233. (Previously presented) The method as in claim 260, wherein said recipient data is
25 acquired as a requisite condition for operating a remote user computer, said remote user computer
26 being operable to gain access to said recipient e-mail address.

1 234. (Previously presented) The method as in claim 260, wherein said recipient data is
2 comprised of alphanumeric text, said alphanumeric text being associated with the at least one
3 biometric attribute of said recipient.

4
5 235. (Canceled).

6
7 236. (Currently amended) A method for verifying whether an e-mail received by a recipient
8 ~~sent by a sending party~~ was accessed by an intended recipient, said method comprising:

9 a) receiving an e-mail into a recipient e-mail address ~~transmitting an e-mail from a sender~~
10 ~~computer to an intended recipient, the sender computer being connected to a communications~~
11 ~~network;~~

12 b) ~~delivering said e-mail to a recipient e-mail address;~~

13 [c] b) detecting an access event, and prompting the party associated with said access event
14 to input recipient data prior to allowing the requested access, said recipient data including
15 identifying data related to the party associated with said requested access; and

16 c) ~~permitting said e-mail to be accessed after the party associated with said access event~~
17 inputs said recipient data; and

18 d) sending recipient identifying data relating to the party associated with said access event
19 for reference by a sending party confirming proper delivery of to identify the party who accessed
20 said e-mail.

21
22 237. (Previously presented) The method recited by claim 264 wherein the step of sending data
23 that identifies said recipient for confirming proper delivery of said e-mail includes the steps of :

24 a) generating a confirmation of receipt notice wherein the data that identifies the recipient
25 is included with said confirmation of receipt notice; and
26
27

1 b) sending said confirmation of receipt notice, wherein the data that identifies the recipient
2 that is included with said confirmation of receipt notice can be compared to information associated
3 with said intended recipient in order to verify whether the email was accessed by the intended
4 recipient.

5
6 238. (Previously presented) The method as in claim 264, wherein said data that identifies
7 said recipient is related to a biometric imprint, alphanumeric text identification, password
8 identification, a computer generated user code, or a combination thereof.

9
10 239. (Previously presented) The method as in claim 264, wherein the data that identifies
11 said recipient is comprised of alphanumeric text, said alphanumeric text being associated with ~~the~~
12 at least one biometric attribute of said recipient.

13
14 240. (Previously presented) The method as in claim 264 further including the step of
15 recognizing biometric attributes of an individual.

16
17 241. (Previously presented) The method as in claim 264, wherein said data that identifies
18 said recipient comprises identity information that identifies an individual.

19
20 242. (Previously presented) The method as in claim 264, wherein said data that identifies
21 said recipient comprises information that identifies a business.

22
23 243. (Previously presented) The method as in claim 264, wherein said data that identifies
24 said recipient comprises information that identifies an organization.

25
26 244. - 247. (Canceled).

1
2 248. (Currently amended) A system for verifying whether e-mail received by a recipient sent
3 ~~by a sending party~~ was accessed by an intended recipient, said system comprising:

4 a) ~~a sender computer connected to a communications network and from which an e-~~
5 ~~mail is transmitted;~~

6 [b] ~~a~~) a recipient computer connected to ~~a said~~ communications network, said recipient
7 computer capable of receiving an said-transmitted e-mail and further having data storage means for
8 storing said received e-mail;

9 [c] ~~b~~) software capable of detecting an access event, wherein, upon detecting said access
10 event, said software prompts the party associated with said access event to input recipient data
11 prior to allowing the requested access and wherein said software further permits said e-mail to be
12 accessed after the party associated with said access event inputs said recipient data, said recipient
13 data comprising identifying data related to the party associated with said requested access; and

14 [d] ~~c~~) means for sending identifying recipient data relating to the party associated with
15 said access event to identify the party who accessed ~~for confirming proper delivery of said e-mail.~~

16
17 249. (Previously presented) The system as in claim 248, wherein said access event comprises
18 access of a delivered e-mail.

19
20 250. (Previously presented) The system as in claim 248, wherein said access event
21 comprises access of an e-mail account associated with the e-mail address to which said e-mail was
22 delivered.

23
24 251. (Previously presented) The system as in claim 248, wherein said access event
25 comprises activation of e-mail processing software associated with the e-mail address to which said
26 e-mail was delivered.

1 252. (Currently amended) A system for verifying whether e-mail received by a recipient sent
2 ~~by a sending party~~ was accessed by an intended recipient, said system comprising:

3 ~~a) a sender computer connected to a communications network and from which an e-mail is~~
4 ~~transmitted;~~

5 [b] a) a recipient computer connected to a said communications network, said recipient
6 computer being capable of receiving said an ~~transmitted~~ e-mail and further having data storage
7 means for storing said received e-mail;

8 [c] b) biometric identification means for recognizing biometric attributes of an individual;

9 [d] c) software capable of detecting an access event and identifying an individual
10 associated with said access event through utilization of inputted biometric attributes of said
11 individual, said software permitting said e-mail to be accessed after input of said biometric
12 attributes of the individual associated with said access event; and

13 [e] d) means for sending data that identifies said individual for identifying the party who
14 accessed said e-mail ~~confirming proper delivery of said e-mail.~~

15
16 253. (Previously presented) The system as in claim 252, wherein said access event
17 comprises access of a delivered e-mail.

18
19 254. (Previously presented) The system as in claim 252, wherein said access event
20 comprises access of an e-mail account associated with the e-mail address to which said e-mail was
21 delivered.

22
23 255. (Previously presented) The system as in claim 252, wherein said access event
24 comprises activation of ~~the~~ e-mail processing software associated with the e-mail address to which
25 said e-mail was delivered.

1 256. - 257. (Canceled).

2
3 258. (Currently amended) A method for verifying whether an e-mail received by a recipient
4 ~~sent by a sending party~~ was accessed by an intended recipient, said method comprising:

5 a) receiving an e-mail into a recipient e-mail address transmitting an e-mail from a sender
6 ~~computer to an intended recipient, the sender computer being connected to a communications~~
7 ~~network ;~~

8 b) ~~delivering said e-mail to an e-mail address;~~

9 [c] b) detecting an access event, and prompting the party that requested said access to input
10 recipient data prior to allowing the requested access, said recipient data including identifying data
11 that is associated with the party that requested said access; and

12 c) permitting said e-mail to be accessed after the party that requested said access inputs
13 said recipient data; and

14 d) sending identifying recipient data relating to the party that requested said access event to
15 identify the party who accessed for confirming proper delivery of said e-mail.

16
17 259. (Previously presented) The method recited by claim 236 wherein said step of sending
18 recipient data for confirming proper delivery of said e-mail includes the steps of:

19 a) generating a confirmation of receipt notice wherein the inputted recipient data is
20 included with said confirmation of receipt notice; and

21 b) sending said confirmation of receipt notice, wherein the inputted recipient data included
22 with said confirmation of receipt notice can be compared to information associated with said
23 intended recipient in order to verify whether the e-mail was accessed by the intended recipient.

24
25 260. (Currently amended) A method for verifying whether e-mail received by a recipient ~~sent~~
26 ~~by a sending party~~ was accessed by an intended recipient, said method comprising:

1 a) receiving an e-mail into a recipient e-mail address ~~transmitting an e-mail from a sender~~
2 ~~computer to an intended recipient, the sender computer being connected to a communications~~
3 ~~network ;~~
4 b) ~~delivering said e-mail to a recipient e-mail address;~~
5 [c] b) detecting an access event;
6 [d] c) acquiring recipient data that is related to biometric identification of the recipient;
7 and
8 d) permitting said e-mail to be accessed after acquiring said recipient data; and
9 e) sending recipient identifying data related to biometric identification of said recipient for
10 identifying the recipient of confirming proper delivery of said e-mail.

11
12 261. (Previously presented) The method as recited in claim 260 wherein said recipient data is
13 acquired prior to said access event.

14
15 262. (Previously presented) The method as recited in claim 260 wherein said recipient data is
16 acquired after said access event.

17
18 263. (Previously presented) The method as recited in claim 260 wherein said recipient data is sent
19 to an e-mail address.

20
21 264. (Currently amended) A method for verifying whether e-mail received by a recipient ~~sent~~
22 ~~by a sending party~~ was accessed by an intended recipient, said method comprising:

23 a) receiving an e-mail into a recipient e-mail address ~~transmitting an e-mail from a sender~~
24 ~~computer to an intended recipient, the sender computer being connected to a communications~~
25 ~~network ;~~
26 b) ~~delivering said e-mail to an e-mail address;~~

1 [c] ~~b~~) identifying a recipient utilizing biometric identification;
2 [d] ~~c~~) detecting an access event; and
3 d) permitting said e-mail to be accessed after acquiring said biometric identification; and
4 e) sending data ~~that identifies~~ related to said biometric identification of said recipient for
5 confirming proper delivery of said e-mail.

6
7 265. (Previously presented) The method as recited in claim 264 wherein said recipient is
8 identified prior to said access event.

9
10 266. (Previously presented) The method as recited in claim 264 wherein said recipient is identified
11 after said access event.

12
13 267. (Previously presented) The method as recited in claim 264 wherein said data that identifies
14 said recipient is sent to an e-mail address.

15
16 268. (Currently amended) A method for verifying whether e-mail received by a recipient ~~sent by~~
17 ~~a sending party~~ was accessed by an intended recipient, said method comprising:

18 a) receiving an e-mail into a recipient e-mail address ~~transmitting an e-mail from a sender~~
19 ~~computer to an intended recipient, the sender computer being connected to a communications~~
20 ~~network ;~~

21 ~~b) delivering said e-mail to an e-mail address;~~

22 [c] ~~b~~) identifying a recipient in association with biometric identification;

23 [d] ~~c~~) detecting an access event; and

24 d) permitting said e-mail to be accessed after acquiring said biometric identification; and

25 e) sending data ~~that identifies~~ related to said biometric identification of said recipient for
26 confirming proper delivery of said e-mail.

1
2 269. (Previously presented) The method as in claim 268 wherein said recipient is identified prior
3 to said access event.

4
5 270. (Previously presented) The method as in claim 268 wherein said recipient is identified after
6 said access event.

7
8 271. (Previously presented) The method as in claim 268 wherein said data that identifies said
9 recipient is sent to an e-mail address.

10
11 272. - 278. (Canceled).

12
13 279. (Previously presented) The system as in claim 252, wherein said data that identifies said
14 individual for confirming proper delivery of said e-mail is sent to an e-mail address.

15
16 280. - 326. (Canceled).

17
18 327. (Previously presented) The method as in claim 236, wherein said recipient data for
19 confirming proper delivery of said e-mail is sent to an e-mail address.

20
21 328. (Previously presented) The method as in claim 236, wherein a remote user computer may
22 be used to gain remote access to said recipient e-mail address.

23
24 329. (Previously presented) The method as in claim 236 wherein the party that is associated
25 with said access event is an individual.

1 330. (Previously presented) The method as in claim 236 wherein the party that is associated
2 with said access event is a business.

3
4 331. (Previously presented) The method as in claim 236 wherein the party that is associated
5 with said access event is an organization.

6
7 332. (Previously presented) The method as in claim 258 wherein said recipient data for
8 confirming proper delivery of said e-mail is sent to an e-mail address.

9
10 333. (Previously presented) The method as in claim 184, wherein said confirmation of receipt
11 notice is sent to an e-mail address.

12
13 334. (Previously presented) The method as in claim 258, wherein said inputted recipient data
14 pertains to alphanumeric text identification, biometric identification, password identification, a
15 computer generated user code, or a combination thereof.

16
17 335. (Previously presented) The method as in claim 208, wherein said confirmation of receipt
18 notice is sent to an e-mail address.

19
20 336. (Previously presented) The method as in claim 260, wherein a remote user computer may
21 be used to gain remote access to said recipient e-mail address.

22
23 337. (Previously presented) The method as in claim 219, wherein said identity information
24 includes alphanumeric text identification.

1 338. (Previously presented) The method as in claim 237, wherein said confirmation of receipt
2 notice is sent to an e-mail address.

3
4 339. (Previously presented) The method as in claim 268 , wherein said data that identifies
5 said recipient is related to a biometric imprint, alphanumeric text identification, password
6 identification, a computer generated user code, or a combination thereof.

7
8 340. (Previously presented) The method as in claim 268 further comprising the step of
9 recognizing biometric attributes of an individual.

10
11 341. - 345. (Canceled).

12
13 346. (Previously presented) The system as in claim 248, wherein said recipient data for
14 confirming proper delivery of said e-mail is sent to an e-mail address.

15
16 347. (Previously presented) The system as in claim 252, wherein said individual is identified
17 prior to said access event.

18
19 348. (Previously presented) The system as in claim 252, wherein said individual is identified
20 after said access event.
